- providing a traditional Chinese medicine composition according to claim 1; and
- administering to the patient an effective amount of the traditional Chinese medicine composition.

Claim 14 (Previously presented): The process according to claim13, wherein the traditional Chinese medicine composition is therapeutic for cancerous tumors which are at least one of digestive tract tumors, lung tumors, and cervix uteri tumors.

Claim 15 (Previously presented): The process according to claim 14, wherein the traditional Chinese medicine composition is therapeutic for digestive tract tumors including at least one of gastric carcinoma, intestinal cancer and liver cancer.

Claim 16-32 (Cancelled).

Claim 33 (Previously presented): A process for treating a patient afflicted with cancer, comprising:

providing the traditional Chinese medicine composition according to claim 2; and  
administering to the patient an effective amount of the traditional Chinese medicine composition.

Claim 34 (Previously presented): The process according to claim 33, wherein the traditional Chinese medicine composition is therapeutic for cancerous tumors which are at least one of digestive tract tumors, lung tumors, and cervix uteri tumors.

Claim 35 (Previously presented): The process according to claim 34, wherein the traditional Chinese medicine composition is therapeutic for digestive tract tumors including at least one of gastric carcinoma, intestinal cancer and liver cancer.

Claim 36 (Previously presented): A traditional Chinese medicine composition having anti-tumor properties, consisting essentially of:

1 part by weight of hydnocarpus;  
0.8-1.4 parts by weight of cochinchina momordica seed;  
0.5-1.1 parts by weight of pangolin scales;  
0.8-1.3 parts by weight of rhubarb; and  
1-1.5 parts by weight of licorice root.

Claim 37 (Previously presented): The traditional Chinese medicine composition according to claim 36, wherein a dose of the composition is 1 part by weight thereof.

Claim 38 (Previously presented): A process for treating a patient afflicted with cancer, comprising:

providing a traditional Chinese medicine composition according to claim 36; and  
administering to the patient an effective amount of the traditional Chinese medicine composition.

Claim 39 (Previously presented): The process according to claim 38, wherein the traditional Chinese medicine composition is therapeutic for cancerous tumors which are at least one of digestive tract tumors, lung tumors, and cervix uteri tumors.

Claim 40 (Previously presented): The process according to claim 39, wherein the traditional Chinese medicine composition is therapeutic for digestive tract tumors including at least one of gastric carcinoma, intestinal cancer and liver cancer.

Claim 41 (Previously presented): A process for treating a patient afflicted with cancer, comprising:

    providing the traditional Chinese medicine composition according to claim 37;  
and  
    administering to the patient an effective amount of the traditional Chinese medicine composition.

Claim 42 (Previously presented): The process according to claim 41, wherein the traditional Chinese medicine composition is therapeutic for cancerous tumors which are at least one of digestive tract tumors, lung tumors, and cervix uteri tumors.

Claim 43 (Previously presented): The process according to claim 42, wherein the traditional Chinese medicine composition is therapeutic for digestive tract tumors including at least one of gastric carcinoma, intestinal cancer and liver cancer.

Claim 44 (Previously presented): A traditional Chinese medicine composition having anti-tumor properties, consisting of:

    1 part by weight of hydnocarpus;  
    0.8-1.4 parts by weight of cochinchina momordica seed;  
    0.5-1.1 parts by weight of pangolin scales;  
    0.8-1.3 parts by weight of rhubarb; and  
    1-1.5 parts by weight of licorice root.

Claim 45 (Previously presented): The traditional Chinese medicine composition according to claim 44, wherein a dose of the composition is 1 part by weight thereof.

Claim 46 (New): A process for treating a patient afflicted with cancer, comprising:  
providing a traditional Chinese medicine composition according to claim 44; and  
administering to the patient an effective amount of the traditional Chinese medicine composition.

Claim 47 (Previously presented): The process according to claim 46, wherein the traditional Chinese medicine composition is therapeutic for cancerous tumors which are at least one of digestive tract tumors, lung tumors, and cervix uteri tumors.

Claim 48 (Previously presented): The process according to claim 47, wherein the traditional Chinese medicine composition is therapeutic for digestive tract tumors including at least one of gastric carcinoma, intestinal cancer and liver cancer.

Claim 49 (Previously presented): A process for treating a patient afflicted with cancer, comprising:

providing the traditional Chinese medicine composition according to claim 45;  
and  
administering to the patient an effective amount of the traditional Chinese medicine composition.

Claim 50 (Previously presented): The process according to claim 49, wherein the traditional Chinese medicine composition is therapeutic for cancerous tumors which are at least one of digestive tract tumors, lung tumors, and cervix uteri tumors.

Claim 51 (Previously presented): The process according to claim 50, wherein the traditional Chinese medicine composition is therapeutic for digestive tract tumors including at least one of gastric carcinoma, intestinal cancer and liver cancer.
